Lecture notes: Available on my web page.

Contents: Character theory of finite groups, representation theory of the symmetric groups.

Homework: There will be 6 homework assignments distributed and collected approximately every two weeks. You are allowed to work in groups, but your final version has to be in your own words and handwriting.

Grades: Your final grade will determined by a curve based on the total number of points you achieved. Each of the 6 homework assignment is worth 100 points. So the maximum number of points you can achieve is 600.
