RESPONDERS' COMMENTS FOR MTH 132 015 (FS16)

Question 16: Would you recommend this instructor to another student? Comments on your classroom experience, the instructor's teaching style, and course materials are very helpful.

- I really appreciated when you would ask us what we needed to review and what we were still confused on.
- I would have have , she is really helpful.
- I would definitely recommend this instructor to another student. However, I didn't really like the flipped classroom teaching style with the videos to watch for homework. I would of preferred that the material was more spent in class. The problems we worked on in class and the ones we needed to do for homework really helped however! I found the class also stimulating and challenging.
- I would recommend this instructor as well as the small class size. The notes online helped the class be more example based, which helps me learn the material better.
- I would recommend this instructor. Very helpful in learning calculus.
- Super nice, very helpful, actually cared about your grade! I would totally recommend Charlotte
- The main issue with the way my instructor taught was that she wrote and spoke about new material as though she were given a script describing how to do math. Not many people like math textbooks because they feel they don't learn well from them, and speaking in this manner is just the same.
- this professor is very good.
- Yes
- Yes I would recommend this instructor to another student. Charlotte was a positive role model, was prompt in her grading, and engaged the class. It also felt as if she truly cared about everyone's success in the course.
- yes, I understand the material very well. Her teaching style is really good
- Yes, I would. Engaging for most of the time. She encourages students to think by asking questions in class and sometimes, does not move on until the students try to answer the question.
- Yes, she's very helpful and willing to give help during office hours.
- Yes. It was easy to understand, however the quizzes seemed a little difficult compared to the exams.
