Errata for

"Combinatorics: The Art of Counting"

In the list that follows p/l (respectively, p//l) refers to the lth line from the top (respectively, bottom) of page p. Also, $A \longleftarrow B$ means A is to be replaced by B.

79/13 We induct on k where the case $k = 0$ is left to the reader. If $k > 0 \longleftarrow$ We do a double induction on k, l where the cases $k = 0$ and $l = 0$ are left to the reader. When $k, l > 0$

85/9 $n > N \longleftarrow k > N$

102//17 $A\ 6 \supseteq B \longleftarrow A \not\supseteq B$

109//4 Use part (b) $\longleftarrow$ Use parts (a) and (b)

110//6 two way $\longleftarrow$ two ways

Thanks to Nick Ovenhouse, and Philip B. Zhang for catching some of these errors.
