## Errata for "Combinatorics: The Art of Counting" (Revised September 1, 2023)

In the list that follows p/l (respectively, p//l) refers to the lth line from the top (respectively, bottom) of page p, ignoring figures. Also,  $A \leftarrow B$  means A is to be replaced by B.

3//17 set of tiles  $\leftarrow$  sequence of tiles

 $3//10 \ \mathcal{T}_0 \longleftarrow \# \mathcal{T}_0$ 

 $3//9 \mathcal{T}_1 \longleftarrow \# \mathcal{T}_1$ 

22/9–10 Let *i* be the smallest such index and let *j* be the first index after *i* where repetition occurs.  $\leftarrow$  Let *j* be the smallest index such that  $v_j$  equals an earlier vertex in the sequence and let  $v_i$  be that earlier vertex.

 $28//2 \operatorname{std} \sigma \longleftarrow \operatorname{std} \sigma'$ 

37/16-17 bijection, that is, when  $n = k \leftarrow$  bijective and n = k are positive integers

49/6 Rogers-Remanujan  $\leftarrow$  Rogers-Ramanujan

47//11 and is  $\leftarrow$  is

59/8 Gessle  $\leftarrow$  Gessel

61, two lines above Proposition 2.6.1: matrix  $C(G) \leftarrow \text{matrix } C = C(G)$ 

69/2 Gessle  $\leftarrow$  Gessel

79/13 We induct on k where the case k = 0 is left to the reader. If  $k > 0 \leftarrow$  We do a double induction on k, l where the cases k = 0 and l = 0 are left to the reader. When k, l > 0

82/18 the that range  $\leftarrow$  that the range 84/15 for any  $n \leftarrow$  for n = 185/9  $n > N \leftarrow k > N$ 100/16 to the enumerating  $\leftarrow$  to enumerating 102//17  $A \in B \leftarrow A \not\supseteq B$ 104/11 Exercise 14(b) of Chapter 1  $\leftarrow$  Exercise 19(b) of Chapter 2 104/14  $\phi^{-1}(O') = 1 \leftarrow \#\phi^{-1}(O') = 1$ 104/15  $\phi^{-1}(O') = 2 \leftarrow \#\phi^{-1}(O') = 2$ 104/17  $\phi^{-1}(O') = 2 \leftarrow \#\phi^{-1}(O') = 2$ 104/21  $\phi^{-1}(O') = 2 \leftarrow \#\phi^{-1}(O') = 2$ 109//4 Use part (b)  $\leftarrow$  Use parts (a) and (b) 110//6 two way  $\leftarrow$  two ways 113//15  $b > \min B_j \leftarrow b > \min B_{i+1}$ 

114/1-9 Throughout this exercise, one should use the inversion statistic, inv, rather than the major index, maj.

 $\frac{120}{15 \pi_k} \longleftarrow \pi_{k+1}$   $\frac{120}{14 k} \text{ is odd} \longleftarrow k \text{ is even}$   $\frac{120}{10 k} \text{ is odd} \longleftarrow k \text{ is even}$   $\frac{120}{9} \text{ even } k \longleftarrow \text{ odd } k$   $\frac{136}{14} \text{ show that} \longleftarrow \text{ show that, for } n \ge 1,$   $\frac{136}{16} \text{ show that} \longleftarrow \text{ show that, for } n \ge 0,$ 

143//5 upper-order ideals  $\leftarrow$  Upper-order ideals  $145/13 X/Y \longleftarrow Y/X$  (in two places) 150/10 finite  $\leftarrow$  finite, nonempty  $151/10 \ z, y, z \longleftarrow x, y, z$  $157//5 \ \hat{0}_{[x,y]} \longleftarrow \hat{0}_{[x,z]}$ 172/2 right-hand  $\leftarrow$  bottom  $173/14 \ y \in I(x) \longleftarrow y \in I(X)$  $173/16 I(X) \to (X) \longleftarrow I(X) \to I(X)$  $177/8 \ 12(c) \longleftarrow 12(a)$ 180 & ff Use  $f_{\phi}$  for  $F_{\phi}$  so there can be no confusion with the factorial function of P.  $182/20 \ s \in \mathbb{C} \longleftarrow s$  is an integer greater than 1 182//18 Add at the end of the sentence: for s with real part greater than 1.  $184/17 \ x, y \in L \longleftarrow x, y \in P$ 184//3 a poset  $P \leftarrow$  a finite poset P $190/2 \#\mathcal{O} \mid \#X \longleftarrow \#\mathcal{O} \mid \#G$ 192//17 function  $\leftarrow$  which is an analytic continuation of the series definition of  $\zeta(s)$  $193/54^2 \leftarrow 2^4$  $\frac{197}{2} \text{ we say} \longleftarrow \text{ we saw} \\ \frac{199}{2} {\binom{X}{k}}^g \longleftarrow \# {\binom{X}{k}}^g$ 205/5 since cycles commute  $\leftarrow$  since disjoint cycles commute 214//4 polynomials  $\leftarrow$  polynomials with nonnegative coefficients  $222/13 \sum_{l(\lambda)=n} \longleftarrow \sum_{\ell(\lambda)=n}$ 224//10 Gessle  $\leftarrow$  Gessel 227/14 Gessle  $\leftarrow$  Gessel 228/7 Gessle  $\leftarrow$  Gessel 231/14 to be replace  $\leftarrow$  to be replaced 231/17 to be replace  $c' := c \longleftarrow c := c'$  $237//1 \ x^{\mathrm{des}\,\pi} \longleftarrow x^{\mathrm{des}\,\pi} + 1$ 238/13 Note  $\leftarrow$  Recall that linear extensions were defined in Section 5.5. Note 240/7 (7.23) yields.  $\leftarrow$  (7.23) yields  $242/5 r_{\pi_k} \longleftarrow r_{\pi_k}(P_{k-1})$  $245/16 P_{k-1} \leftarrow P_{k-1}$ , assuming  $j \ge 2$ . When j = 1, a similar proof will work 244//14 st  $U \leftarrow \operatorname{sh} U$  $259/10 \ \gamma = \omega^i \longleftarrow \gamma = \omega^j$  $268/14 \ i_1 < i_1 \longleftarrow i_1 < i_2$  $268//17 \ 7M_{121} \longleftarrow M_{121}$ 269//10 impose by  $\alpha \leftarrow$  imposed by  $\alpha$  $278/7 \ \sigma \in \mathfrak{S}_n(\Pi) \longleftarrow \sigma \in \operatorname{Av}_n(\Pi)$  $278//14 \ \sigma \in \mathfrak{S}_n(\Pi) \longleftarrow \sigma \in \operatorname{Av}_n(\Pi)$ 

Thanks to Eli Bagno, Shalom Eliahou, David Garber, Cullen Haselby, Jamie Kimble, Florence Lam, John Lentfer, Tamsen McGinley, Astrid Olave-Herrera, Nick Ovenhouse, Ankit Sahu, Jenny Zhan, and Philip B. Zhang for catching some of these errors.
