

# CRAIG GROSS

---

## Contact Information

Email	grosscra@msu.edu
Website	<a href="https://math.msu.edu/~grosscra">https://math.msu.edu/~grosscra</a>
GitLab	<a href="https://gitlab.com/grosscra">https://gitlab.com/grosscra</a>
GitHub	<a href="https://github.com/cgross95">https://github.com/cgross95</a>
Work Address	Department of Mathematics, Michigan State University 619 Red Cedar Road C516 Wells Hall East Lansing, MI 48824

---

## Education

Present	Ph.D. Applied Mathematics, Michigan State University, East Lansing, (Anticipated May 2023), Advisor: Mark Iwen
May 2017	B.S. Mathematics & Computer Science, summa cum laude, University of Arizona, Tucson, Advisor: Andrew Gillette

---

## Professional Experience

Fall 2019 – Spring 2020, Spring 2021 – Summer 2021, Spring 2022 – Summer 2022	<b>Research Assistant</b> , Michigan State University
Summer 2018 – Fall 2019, Fall 2020, Fall 2021, Fall 2022	<b>Teaching Assistant</b> , Michigan State University
Summer 2020	<b>Data Science Student Intern</b> , Lawrence Livermore National Laboratory. <ul style="list-style-type: none"><li>– Investigation of vortex detection in large scale OpenFOAM fluid flow simulations in a high performance computing environment.</li><li>– Machine learning approaches for biometric matching with MRI data.</li><li>– Mini courses in graph theory, multivariate regression, deep learning, and computational design of experiments.</li></ul>
Spring 2014 – Fall 2016	<b>Undergraduate Research Assistant</b> , University of Arizona. <ul style="list-style-type: none"><li>– Implementation of serendipity basis function generations for finite element method. Project received Excellence in Undergraduate Research for Department of Mathematics.</li></ul>

---

## Research Interests

Compressive sensing, high dimensional function approximation, uncertainty quantification, numerical partial differential equations, high performance computing.

---

## Publications

### Published journal articles

- C. Gross, M. Iwen, L. Kämmerer, and T. Volkmer. Sparse Fourier transforms on rank-1 lattices for the rapid and low-memory approximation of functions of many variables. *Sampling Theory, Signal Processing, and Data Analysis*, 20(1):1, Dec. 2021
- C. Gross, M. A. Iwen, L. Kämmerer, and T. Volkmer. A deterministic algorithm for constructing multiple rank-1 lattices of near-optimal size. *Advances in Computational Mathematics*, 47(6):86, Dec. 2021

### Undergraduate

- A. Gillette, C. Gross, and K. Plackowski. Numerical studies of serendipity and tensor product elements for eigenvalue problems. *Involve*, 11(4):661–678, 2018

---

## Talks

### Conference talks

- *Sparsifying high-dimensional, multiscale Fourier spectral methods*. Contributed talk, Canadian Mathematical Society summer meeting, St. John's, Newfoundland and Labrador, Canada, June, 2022.
- *A walk around the torus: SFTs in many dimensions*. Contributed talk, Online International Conference on Computational Harmonic Analysis, Online, September, 2021.

### Invited talks and funded visits

- *Applications of compressive sensing and high-dimensional function approximation in uncertainty quantification*. Analysis research seminar, Technische Universität Chemnitz, Chemnitz, Germany, January 22, 2020.

### Other talks

- Semester long graduate level lecture series on compressive sensing and PDE-based uncertainty quantification to prepare for comprehensive exam, Michigan State University, Fall 2019.
- Various seminar talks, Michigan State University, 2017 - 2022.

---

## Workshops and Conferences

### Workshops attended

- Data Science for Democracy, Johns Hopkins University, Baltimore, Maryland, June, 2022.
  - Worked with Baltimore Transit Equity Coalition to demonstrate impact of potential improvements to public transit system for disadvantaged areas in the city.
  - Final product available at: <https://arcg.is/0SePnT>.
- AARMS CRG Scientific Machine Learning workshop, Memorial University of Newfoundland, St. John's, Newfoundland and Labrador, Canada, June, 2022.
- PDE-based uncertainty quantification, Argonne National Laboratory, Lemont, IL, May, 2019.
- Finite element method for eigenvalue problems, Michigan Technological University, Houghton, MI, July, 2016.

## Conferences attended

- Canadian Mathematical Society summer meeting, St. John's, Newfoundland and Labrador, Canada, June, 2022.
- paraDIGMS (Diversity in Graduate Mathematical Sciences), Online, April, 2020 and 2022
- Online International Conference on Computational Harmonic Analysis, Online, September, 2021
- Concentration week in randomness and determinism in compressive data acquisition, Texas A&M, College Station, TX, July, 2019.

---

## Teaching Experience

### Michigan State University

- Teaching assistant

Fall 2021	Standards based graded college algebra (Instructor of record)
Fall 2020	Calculus II (Recitation instructor)
Fall 2019	Differential equations (Recitation instructor)
Spring 2019	Differential equations (Recitation instructor)
Fall 2018	Survey of calculus (Instructor of record)
Summer 2018	Calculus I, online section (Exam writing, live-streaming review sessions, compiling supplemental instructional material)
When teaching	Math learning center tutor
- Other projects

Summer 2019	MATLAB-based Calculus II labs. <ul style="list-style-type: none"><li>– Producing screen-cast video introductions and recaps of MATLAB-based programming labs for application focused sections of Calculus II.</li><li>– Collaborated with and supervised undergraduate assistant in producing accompanying text-based introductions.</li></ul>
-------------	--
- Teaching mentorship

Fall 2019,	Lead TA, Calculus II
Fall 2021	<ul style="list-style-type: none"><li>– Observing, holding meetings with, and mentoring new teaching assistants and assisting in implementation of MATLAB-based programming labs.</li></ul>
Spring 2018	Teaching mentor to first year graduate student
- Professional development

Spring 2022	Facilitating Accessible and Inclusive Mathematics Learning Environments <ul style="list-style-type: none"><li>– Semester-long workshop pilot run by Program in Mathematics Education at MSU.</li><li>– Covered topics such as building student relationships and safe spaces for anti-deficit learning environments, student supports, legal theory and practice of mathematics accommodations, and universal design.</li></ul>
2017 – 2018	Introductory teaching workshop from MSU Center for Instructional Mentoring. <ul style="list-style-type: none"><li>– Covered topics such as inclusive teaching, formative assessment, active learning, effective group work strategies, and lesson planning.</li></ul>

## University of Arizona

- Undergraduate teaching assistant  
Spring 2014 | Calculus I

---

## Scholarships and Awards

2022	TA Award for Excellence in Teaching in the Department of Mathematics, Michigan State University (\$400)
2022	Douglass A. Spragg Endowed Fellowship, Michigan State University (\$1,800)
2020	Dr. Paul and Wilma Dressel Endowed Scholarship, Michigan State University (\$1,900)
2017	Department of mathematics recruiting fellowship, Michigan State University (\$8,000)
2017	Early start fellowship, Michigan State University (\$6,000)
2017	Excellence in undergraduate research for Mathematics Department and finalist for College of Science, University of Arizona
2013 – 2017	Arizona wildcat excellence scholarship, University of Arizona (\$40,000)
2013 – 2016	Worth and Dot Howard Foundation Scholarship (\$4,000)
2015	Galileo Scholar, University of Arizona (\$1,000)

---

## Service and professional organizations

- **President**, MSU AMS Graduate Student Chapter, Fall 2020 – Spring 2021.
- **Member**, MSU AWM Student Chapter, Fall 2020 – Present.
- **Member**, MSU AMS Graduate Student Chapter, Fall 2019 – Present.
- **Member**, Canadian Mathematical Society (CMS), Spring 2022 – Present.
- **Member**, American Mathematical Society (AMS), Fall 2017 – Present.
- **Member**, Society for Industrial and Applied Mathematics (SIAM), Fall 2017 – Present.

---

## Selected Graduate Coursework

- |                                       |   |   |
|---------------------------------------|---|---|
| • Measure theory                      | • Elliptic regularity                               | • Machine learning                              |
| • Complex analysis                    | • Numerical PDE                                     | • Optimization                                  |
| • Numerical linear algebra            | • Probability                                       | • Spectral graph theory                         |
| • Numerical ODE                       | • Applied harmonic analysis:<br>compressive sensing | • Project-based study in industrial mathematics |
| • Introduction to PDE (two semesters) |   |   |

---

## Relevant Skills

Proficiency	C/C++, Git, Java, L <sup>A</sup> T <sub>E</sub> X, MATLAB, Python, Unix/Linux environments.
Familiarity	HPCC Environments, Mathematica, OpenFOAM, R.
