RESPONDERS' COMMENTS FOR MTH 103 202 (US16)

Question 16: Would you recommend this instructor to another student? Comments on your classroom experience, the instructor's teaching style, and course materials are very helpful.

- I really liked your teaching style ! Best of luck for your future career , Reshma !
 - I think the instructor should get improved on calculator using.
 - I would definitely recommend this instructor to another student. The instructor was excellent. She clearly cared about the actual learning process and progress of the students as demonstrated by her willingness to go over problems from each lecture section, homework, quiz, and exam. Her tendency to apply real-life analogies to mathematical problems was very helpful! The only challenge of this course is that there is far too much material to cover in such a short amount of time, especially during a summer course. While it is fast-paced, it is difficult to fully comprehend the material in its entirety due to the nature of the pace of this course.
 - I wouldn't, she seemed bothered when students didn't understand material and she rushed through a lot of the problems expecting students to follow completely.
 - Reshma was fantastic. This is my second time taking Algebra (I took a regular paced class in the spring) and I felt that I understood more this time around. I despise math, and Reshma was extremely patient with me with my many questions. She made herself available whenever she could to answer questions out of class. I have noticed myself getting better at Algebra through the short time of this course. Reshma should be a full time professor for MSU.
 - Yes
 - Yes, she always trying to help.
