RESPONDERS' COMMENTS FOR MTH 235 015 (FS17)

Question 16: Would you recommend this instructor to another student? Comments on your classroom experience, the instructor's teaching style, and course materials are very helpful.

- A great teacher, very excited and invested in our success. She was good at teaching, and would go above and beyond to help a student. Thanks so much!
 - absolutely, she's great and she tries really hard to be effective
 - Amazing teacher. Definitely the best I've ever had. Whenever I didn't understand material, I could ask Prof. Sendova and it would be like she said two words and I understood everything. She was constantly looking for feedback and always was very responsive and helpful. Would take this class again haha.
 - Awesome math teacher. Made learning calculus really easy and simple.
 - Great Professor. She did an amazing job and appreciated her teaching throughout the whole semester. I am so happy I had her as a professor
 - I love her! She is fantastic and I would recommend that every student should be taught by her.
 - I would definitely recommend Professor Sendova to other students. Her teaching style was extremely understandable and she made the material enjoyable. I am very happy I took the honors section and pilot of a new class. While comparing the material of the honors section to regular sections I highly suggest the format shift to the honors style. The labs were extremely helpful, but I do suggest less focus on Matlab since it is hard to understand the programming. Overall, the course was well organized and I feel that the material will be useful in my future classes. In fact I am already seeing practical applications in classes like Statics.
 - I would definitely recommend this professor to any student. Professor Sendova was one of the most effective and organized professors I have ever had. She was always well prepared for class and taught the material in an extremely helpful and engaging manner. She answered every question with great detail and always encouraged further discussion. The class was very well organized and the professor's teaching was exceptional.
 - I would highly recommend Dr. Sendova to any student. She was always very enthusiastic about the material, which helped me to learn better. She was available during office hours and on Piazza pretty much all the time, and she encouraged questions. I never felt afraid to speak up in her class, and she was very friendly to all of the students. Overall, definitely the best professor I've had in college so far.
 - One of the best instructors I've ever had. Clearly cared about her students and worked hard to make sure we understood all the material.
 - Prof. Sendova is one of the best mathematics professors I have ever had, if not one of the best professors in general I have ever had. She is clearly incredibly competent, and knows the material extremely well, which helped a lot when I had questions. The class is very well organized in terms of lecture structure and homework assignments. Additionally, Prof. Sendova is an incredibly lively and approachable teacher; she is not only readily available to help when needed, but is very much happy to do so. I would most certainly recommend Prof. Sendova to anyone debating taking a class taught by her.
 - Prof. Sendova was *excellent* for this course. I often hear about students struggling in 235 with other professors, but not with Prof. Sendova. She is encouraging, open-minded, and overall a fantastic teacher. I would highly recommend her to anyone and everyone taking 235 in the future.
 - She can be kind of confusing in her methods, but she is always willing to help you understand. I would recommend her.
 - Yes yes yes. I love having Professor Sendova for this class. She is excited to teach, excited to see us learn, and wants us all to be successful. I never feel afraid to ask a question and I know she does a great job teaching.
 - Yes. Dr. Sendova is extremely helpful and a great instructor. I really enjoyed her class despite the math sometimes being difficult, she was always receptive to questions and suggestions
-
