RESPONDERS' COMMENTS FOR MTH 299 005 (FS18)

Question 16: Would you recommend this instructor to another student? Comments on your classroom experience, the instructor's teaching style, and course materials are very helpful.

- Definitely.
- He is a very excellent professor, explaining the question clearly with patience. I can definitely understand what the stuff she taught.
- I would highly recommend Charlotte to another student. I wish she taught other math courses. She would try to change up class to make it more engaging and fun, and she is able to explain something in different ways until it makes sense to you. She's awesome. Love her! 5 stars
- If you can upload the material use in the class that will be very useful for us to review. For instance, every question that have use in the class.
- love the professor
- Overall good instructor. I had to work hard at learning the material, but Charlotte did her best to prepare us for exams and to complete the homework. She made extra practice sheets for the exam which I really appreciated.
- She was very understanding and wanted us to learn and just try our best. After having a sub for a week I realized I hadn't appreciated her as much as I should have.
- yes
- Yes! First instructor at MSU to care about each student as much as possible. Really accommodating to each student between illnesses etc. Tries to make the class as stimulating and engaging as possible. Also, relatable and admits it is hard which is encouraging. Harsh grader though.
- Yes!!!! Charlotte has been the best college math instructor I have ever had, and this is my eleventh one. I think I am very lucky I ended up in her section. She is so great at explaining every last detail of what is needed to be understood for every concept. She is very well organized, communicates very well with the class, and promotes discussion while also leading it. She really "teaches" in the sense that she pays attention to whether or not her students understand, and does not fast-forward to new content if anyone seems confused. She moves quickly, but somehow remains friendly and personable with the students. I love how she also puts examples of the difficult material online and utilizes D2L - many instructors, especially math instructors, don't like to deal with uploading documents to the web. Anyway, she's been great. 5 stars absolutely
- Yes, I would recommend. Always looked forward to the class and was helped one on one on multiple occasions. Very knowledgeable and cared about your personal understanding of content.
- Yes. She is so nice.
